About the Book

Ephemeral Eternities is a powerful debut by the enigmatic poet Surreption. This haunting, spiritual, and emotionally charged collection explores themes of grief, identity, transcendence, and the liminal spaces we all inhabit: between dark and light, past and future, love and loss.

Structured as a journey through reflection, fragmentation, and quantum longing, *Ephemeral Eternities* bends time and perception with lyrical intensity. The collection is divided into thematic sections—*Stellar Dust and Earthen Dreams*, *Fractured Reflections*, *Quantum Entanglements*, *Vertigo*, *Collective Refraction*, *Thanatopsis Reveries*, and *A Little Sex Anyone?*—each holding a mirror to the soul and breaking it just enough to let the light in.

Surreption writes under a pseudonym, blending autobiographical threads with mythic, surreal, and metaphysical tones. The result is a body of work that feels both deeply personal and universally resonant.
